

# Platforms, Gantry's & Access Ladders

Historically we have worked on many Air-handling Gantry's and Maintenance Platforms, ranging from small to large platforms designed to take loads exceeding 5000kg.

Working closely with Main Contractors and Building Services customers.

We design, manufacture and Install Equipment Platforms and Gantry's & Mezzanine floors.

We will initially put together budget costs to satisfy the customer's financial plans, and then once agreed we will undertake the Design, Manufacture and Installation work.

We undertake all the necessary structural design calculations and offer a turn key package, including Access Ladders and Safety Hand-railing.

Alternatively we can offer a quotation based upon pre-designed drawings and specification.

Please contact us to discuss your specific needs.
