

Cad Cam Profiled Parts

We use the latest CAD software to accurately detail the jobs.

This married to our integrated Cad/Cam software produces quick, accurate and consistent profiled parts.

The software “nests” the parts to maximise sheet usage and minimise material wastage.

This helps maintain competitive pricing.

We profile steel and aluminium parts accurately from up to 10mm thick using sheet sizes up to 3m x 1.5m (10' x 5').

Material thickness capability:-

Mild Steel 0.5mm to 10mm

Aluminium 0.5mm to 10mm

Stainless Steel 0.5mm to 6mm
