

# TIPTOE

## SUPPORT SYSTEMS for FLAT ROOFS

**TIPTOE** is a modular bolt-able framework system which sits on load spreading feet.

Although designed with Air-Conditioning units in mind **TIPTOE** will support anything on a flat roof including Electrical Tray, Pipework, Ductwork etc

### Specifying;

**TIPTOE** ....Is a modular system and comes in kit form, and has 4 basic modular frameworks; TT01, TT02, TT03 & TT04

It has hot dipped galvanised metalwork and tightens with a wrench to give rigidity. It Eliminates roof penetrations and prevents damage to the roof surface by spreading the load.

### Purchasing;

**TIPTOE** ....Is cost effective. Compared to similar flat roof support systems Tiptoe offers a cost saving.

### Planning;

1. Easy to detail.
2. Flexible for foot positioning.
3. Simple to design with. and programming

Reduce co-ordination of trades by specifying for all contractors to use Tiptoe.

### Delivery;

**TIPTOE** ....is flat packed for transportation.

### Site Installation;

#### **TIPTOE** ....

- Is universal.
- Is lightweight
- Is adjustable for height
- Is adjustable for linear positioning
- Is adjustable for uneven surface.
- Is simple, quick and flexible to use.

### Maintenance;

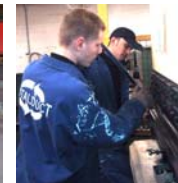

**TIPTOE** .... Maintenance costs are reduced as re-roofing is simplified

**De-commissioning** - Just un-bolt and take it away.

**Here's what is supported;** Air conditioning units, Chillers, Fans, Pipework, Electrical work, Ductwork - It'll support heavy loads.....
